Haja Shafrith Suhail

Senior Software Engineer | Angular | GenAI & Agentic AI

+91-8526432884 | shafrith777@gmail.com | linkedin.com/in/shafrith-suhail | Open to relocation

Professional Summary

Senior Software Engineer with 4+ years of Angular experience (v15 to the latest v21) and 7+ years in software development. Currently at Anteriad, building an enterprise lead-delivery platform with Angular 21, TypeScript and RxJS.

Building hands-on Generative AI and agentic AI skills through projects in RAG, multi-agent systems (CrewAI, AutoGen) and n8n automation. Earlier background in PHP/Laravel and Selenium test automation.

Technical Skills

Frontend: Angular (v15 - v21), TypeScript, JavaScript (ES6+), RxJS, Reactive Forms, HttpClient & Interceptors, Route Guards, Lazy Loading, Control Flow (@if/@for), Custom Pipes & Directives, HTML5, CSS3, SCSS, Bootstrap 4, Angular CDK

Libraries & Data Viz: Highcharts, jSpreadsheet, PptxGenJS (PPT export), AWS S3 SDK

GenAI & Automation: LangChain, CrewAI, AutoGen, RAG, FAISS, Neo4j, OpenAI API, MCP, n8n

Backend & Tools: Python, Django, FastAPI, Streamlit, PHP (Laravel), PostgreSQL, Docker, AWS, Git, CI/CD (Bitbucket Pipelines), Selenium, Unit Testing, Agile/Scrum

Professional Experience

Senior Software Engineer (Angular) - Anteriad Pvt Ltd | Aug 2023 - Present

- Build and maintain features for Anteriad's enterprise lead-delivery platform, used by the operations team, in Angular 21, TypeScript and RxJS.
- Build Highcharts dashboards, jSpreadsheet data grids and one-click PowerPoint export (PptxGenJS), with file storage on AWS S3.
- Implement role-based access with 28 route guards, HttpClient interceptors for auth and errors, and complex Reactive Forms with custom validators.
- Contribute 1,500+ commits across 8 business domains, including Planning, Allocations, Quality Control, Ticketing and Reports.
- Work in Agile sprints, review pull requests and ship releases through Bitbucket Pipelines CI/CD.

Software Engineer - Vyshnavi Information Technologies Pvt Ltd | Mar 2019 - Mar 2023

Angular Developer, IntelliBuddies project | Aug 2022 - Mar *2023*

- Developed and maintained features for a full-scale, multi-module web application using Angular, TypeScript, HTML, and CSS, with responsive layouts and cross-browser compatibility.
- Integrated the front end with backend APIs, working closely with backend developers.
- Handled code reviews, debugging and Scrum ceremonies (grooming, estimation, demos, retrospectives).

PHP Developer & Selenium Automation, Market Rhythm project | Mar 2019 - Jul *2022*

- Built features for a marketing web application with PHP (Laravel), JavaScript and PostgreSQL; ran scheduled jobs with Docker on AWS ECS/Fargate.
- Built a Python Selenium automation framework (Page Object Model) for cross-browser testing on 3 browsers (Chrome, Firefox, IE), and an Angular + Django UI to run tests on AWS Device Farm.

AI Projects (Personal)

- **Hybrid RAG Customer Support:** answers questions from uploaded PDFs using FAISS vector search plus a Neo4j knowledge graph; LangChain, OpenAI, FastAPI, Streamlit, Docker Compose.
- **Multi-Agent IT Workspace:** four AutoGen agents (Developer, Tester, IT Admin, HR) collaborate on tasks, with Gmail API integration via Google OAuth 2.0.
- **Customer Support Crew:** three sequential CrewAI agents (knowledge, live web search, response and logging) behind a Streamlit chat UI with session memory.

Education

B.Tech, Information Technology - Karpagam College of Engineering | 2015 - 2019
